

Authority: Executive Committee Item EX15.10, as adopted
by City of Toronto Council on June 26 and 27, 2024
City Council voted in favour of this by-law on July 25,
2024
Written approval of this by-law was given by Mayoral
Decision 17-2024 dated July 25, 2024

CITY OF TORONTO

BY-LAW 848-2024

To amend City of Toronto Municipal Code Chapter 219, Records, Corporate (Local Boards), to establish a records retention schedule for the Board of Management of the Toronto Zoo.

Whereas under Section 201 of the City of Toronto Act, 2006, the City may establish retention periods during which the records of the City and its local boards must be retained and preserved; and

Whereas the Board of Management of the Toronto Zoo approved the Board's records retention schedule on May 31, 2024; and

Whereas Council has authorized changes to Municipal Code Chapter 219, Records, Corporate (Local Boards), to establish records retention periods for the Board;

The Council of the City of Toronto enacts:

1. City of Toronto Municipal Code Chapter 219, Records, Corporate (Local Boards) is amended by:
 - a. adding a new Article VIII, Toronto Zoo, as set out in Schedule A of this by-law.
 - b. adding a new Schedule J, Art. VIII, Records Retention Schedule (Toronto Zoo), as set out in Schedule B of this by-law.
2. This by-law shall come into force on the day it is passed.

Enacted and passed on July 25, 2024.

Frances Nunziata,
Speaker

John D. Elvidge,
City Clerk

(Seal of the City)

INSERT SCHEDULES A AND B

Classification Structure and Retention Schedule

Overview

The records classification and retention structure is a valuable tool to manage the records and information created or received by the Toronto Zoo and as such, it is an important strategic business resource. The systematic application of managing information through a classification structure allows for the control of information assets throughout its lifecycle. By consistently identifying information, regardless of where it is held, the structure removes barriers to access (assuming appropriate permissions) while also protecting privacy and allows information to be available in a timely fashion to those who need it. This access is essential for supporting decision-making and sharing the knowledge developed through collaboration efforts. Such a system also supports accountability and good governance, protects personal and confidential information captures and preserves the corporate memory and the history of the Toronto Zoo while improving organization efficiencies and mitigating risk.

Toronto Zoo's Classification and Retention Schedule is the official policy for the management of records at the Toronto Zoo. It provides staff with the authority to manage records in accordance with relevant policies, legislation and regulations. The Toronto Zoo has adopted the International Organization of Standards (ISO 15489) for a functionally based classification structure to provide a hierarchical framework for the organization and description of records. The structure is based on the content of the document and applies to all records, regardless of whether they are in paper, digital, image, audio or video format. Each classification category is accompanied by a retention timeframe that reflects applicable legislation and business need. The main reasons for a functional approach are as follows:

- Eliminates duplication of records because all records related to a specific function are grouped together rather than split up among departments. For example, all employee records will be under the Human Resources function;
- Provides integrity and thus reliability when searching for information within the central repository because all "like" things are filed together rather than "classified" under different departments;
- Business functions are independent of organizational structure. Changes in organizational structure do not affect the classification scheme. It doesn't have to be "re-invented"
- Department names are forever changing but functions remain constant;
- Reduces silos of information.

The functions of Toronto Zoo are as follows:

- | | |
|---|---------------------------|
| ✓ Administration | ✓ Fundraising & Marketing |
| ✓ Asset & Infrastructure Management | ✓ Governance & Legal |
| ✓ Communications, Promotion & Stakeholder Relations | ✓ Human Resources |
| ✓ Financial | ✓ Animal Records |

Definitions

RECORD: The International Organization for Standardization (ISO) defines a record as *“recorded information in whatever physical format created, collected or received in the initiation, conduct or completion of an activity which has content, context and structure, is authoritative and reliable, provides evidence of decision-making”*. Records can include books, papers, maps, electronic documents, digital, video, voice recordings, web pages, etc.

TRANSITORY RECORDS are useful for only a short time, communicate information that is ephemeral, are temporary and have minor importance. When use is over they should be deleted or destroyed. Transitory records can be destroyed at any time before the retention period of the original document as the official or original document is held by the originator/primary area of accountability and subject to the approved retention period. Examples of transitory records include the following:

- personal messages;
- general notices and announcements;
- copies of documents and emails;
- cc, bcc, or FYI emails kept only for convenience;
- drafts and working documents to prepare final records.

NON-RECORDS have no bearing on the organization’s functions, operations, or mandate. These may be general distribution items, reference books, published legislation from other Zoo’s or government agencies or extra copies/convenience copies. Non-records are typically used, if ever, only for a very limited period of time. They do not have to be collected and maintained. These documents are not required to be retained and therefore do not appear on a records retention schedule.

CONVENIENCE COPIES

- Convenience Copies are, by definition, not considered records as they are usually duplicates of the official record. They could also be a FYI copy (for your information). However, recent legal actions have drawn attention to the use of convenience copies for purposes of evidence or discovery. Incidents have occurred where primary documents have been destroyed as per established retention schedule but convenience copies still existed in the organization. These copies have been deemed to be official and subject to discovery or legal proceedings. Given these legal implications it is important for Toronto Zoo, if required, to classify convenience copies and ensure they are tracked and destroyed or disposed of no later than the retention period of the original document.
- Convenience copies should not be sent to storage.

Classification Scheme & Retention Schedule Table Headings Description

Function

The function represents the largest units of all the activities of an organization. They are the major responsibilities that are managed by an organization to fulfil its mission or mandate and its responsibilities to its stakeholders.

Activity

The activities are the tasks performed to accomplish the function e.g. Human Resources (function), Recruitment & Selection (activity)

Record Series

Record series are defined as a group of related records that have the same form and function, are filed as a unit and are maintained together for retention scheduling purposes. Record series are destroyed as a unit when the retention period is up unless there is a litigation or audit hold on the record series. The record series are grouped into broad organizational functions. The types of documentation found in each record series are described in what is referred to as a scope note.

Accountability

This classification scheme identifies the Office of Accountability – the business unit or department who is accountable for ensuring that the official record is managed throughout its lifecycle. This is the business area that has primary interest or ownership of the records. They are considered to be the official holder of the original records. When accountability refers to the “all departments” it applies to all departments – meaning that they have responsibility to classify and manage the original record e.g. departmental meetings.

Retention

The column labelled “Total Retention” specifies the length of time records must be kept. An event such as the termination of an agreement, project close, may be used to indicate when the retention calculation begins.

Disposition

The column labelled “**Disposition**” refers to how the records are disposed of at the end of their lifecycle. Once the records have reached the end of their total retention period they may be totally destroyed/expunged, or all or part of the record series may be designated as archival review or archival which means either some (archival review) or the entire record series (archival) is kept for future generations. The Archives for the City of Toronto will require that the Toronto Zoo annually box those records designated as “archival review” according to the retention schedule and forward those records to the Archives for archival assessment. Records identified in the classification structure and retention schedule can only be destroyed / disposed of in accordance with the Toronto Zoo’s records destruction procedures and in conjunction with approval from Office of Accountability. All destroyed records should be documented by a certificate of destruction as proof of final disposition. The certificate of destruction is a permanent document to prove destruction took place, what records were destroyed and when they were destroyed.

Security Classification

In order to protect the confidentiality, integrity and availability of Toronto Zoo’s data, each record series is assigned a security classification public, internal or confidential.

Public: This classification applies to information in the public domain. The information is fit for distribution via public channels such as email and websites. Disclosure of Public information is not expected to adversely impact Toronto Zoo, its employees, its stakeholders, its business partners, and/or its customers.

Internal Use: This classification applies to general information intended or appropriate for any internal audience or a restricted external audience such as stakeholders. Internal access is unrestricted but external access is based on a business need-to know basis.

Confidential: This classification applies to the most sensitive business information that is intended for a limited audience. Its unauthorized disclosure could seriously and adversely impact Toronto Zoo, its employees, its stakeholders, its business partners, and/or its customers. Records which are designated as confidential are accessible only by a defined sub-group of Toronto Zoo. Access permissions may be given to staff based on their membership to a specific group or individually as Toronto Zoo’s management deems appropriate.

Citations / Comments

The Citation/Comments column provides the cross-reference identifier to the legislative citations that are recommended as applicable for each category of records based on the City of Toronto’s retention by-law.

Legend for Retention Terms

Code	Definition	Description
A	Archival	Record Series which has been assessed to have historic significance. Archival documents are retained for 10 years at which point they are appraised again for historic importance and possibly archived for another 10 years. Every 10 years they are reviewed for historical significance. For electronic records they are reviewed to determine if these will continue to be migrated.
AR	Archival Review	Refers to reviewing the records series before destruction to see whether they have historic significance prior to destruction. This is different from archival because in the case of an archival designation the entire records series is kept for posterity, whereas, in archival review, records are “selected” for potential historic significance. The entire record series may not be kept.
CY	Current Year	Refers to January 1 st to December 31 st . This means that the record series is kept for the current year plus the additional years outlined in the retention schedule e.g. CY+2 means that the current year plus 2 additional years will be kept.
D	Destroy	Requires that upon expiration of the retention period the document is destroyed – shredded, recycled, deleted (expunged).
S	Superseded	Refers to the replacement of a document once it has been updated or revised. The new document supersedes the previous version.
T	Event Trigger for termination or close of an event or activity	Refers to a record being retained until it has been closed, terminated or expired, resolution of a claim, typically used for case-based or project records where the retention refers to the case being closed or the transaction being completed. This retention applies to an employee file and is triggered at the point at which the employee leaves the organization. These records are usually maintained until the case or transaction or employee record is closed/terminated plus a pre-defined number of years.
P	Permanent	Records that are never to be destroyed.
PIB	Personal Information Bank	Refers to records of individuals who are identifiable by home address, phone number, SIN#, OHIP#, etc. This information is protected under the MFIPPA legislation.
